TO REQUEST A SAFETY CONSULTATION

Trench work involves many potentially lethal hazards. Failing to properly classify the soil type, perform trench inspections, and use protective systems can all result in a fatality. But taking proper preventative measures can ensure trench work is completed safely! **Join us for a day of education and information sharing on this topic!**

SEMINAR AGENDA/TOPICS

- Trenching Safety Overview
- Utility Protection
- How Expectations Shape Decisions
- Trench Collapse Rescue
- Trench Safety Training Opportunities – U of C
- Quick Coupler & Excavation Demo
- Hazards Unique to Trenching
- Trenching and Traffic Management
- Testimonial

**• Panel Discussion / Q & A:
With OSHA and BWC's Division of Safety & Hygiene and PERRP.**
